BEYOND THE SCORE

Case 4 · Trace Sheet

Design apparatus for BTS_Case4_Reading

1 · CASE POSITION (HISTORICAL DESIGN)

Pilot 1, Case 4 of 4. Keying (as designed): Māori intergenerational household on ancestral whenua near Kaikohe; legacy housing on land in trust, not individually titled. Scenario: address unverifiable for an insurance discount; whenua-based exclusion. Trigger events: youth driver insurance discount denied; council adaptation support unreachable without formal title. Household: Wiremu (18), Moana (43), Koro Hēmi (74); the uncle and niece are unvoiced presences. Actor: institutional — address-verification and risk-zoning systems reaching the household through form rejections; single-scene exposure. Lead card: the member the system addressed (Wiremu).

2 · CORPUS ANCHORS

Wiremu: anticipated exclusion and withdrawal — Fleming et al. (2020); Paine, Neumann, & Yao (2023). Whakapapa pride against digital invisibility — Kukutai & Taylor (2016); King-Finau et al. (2021); Statistics New Zealand (2020b). Māori youth digital underconnection — Grimes & White (2019, Tables 6–11); King-Finau et al. (2021).

Moana: system fatigue and untranslatable identity — Kukutai & Taylor (2016); Statistics New Zealand (2020b); Durie (2019). Relational caregiving under cultural obligation — Superu (2015). Kanohi ki te kanohi preference and whānau-routed navigation — Te Mana Raraunga (2016); Durie (2019).

Koro Hēmi: land tenure memory, communal-to-individual title shift — Kukutai & Taylor (2016); Statistics New Zealand (2021b); Durie (2019); Ministry of Housing and Urban Development (2021b). Data collection distrust grounded in land loss and state intervention — Te Mana Raraunga (2016); Kukutai & Taylor (2016). Non-digital authority, expressed as kanohi ki te kanohi preference and person-routed navigation — Durie (2019); Te Mana Raraunga (2016); access context — Grimes & White (2019, Table 13).

Scene: whenua Māori and formal address systems in conflict — Statistics New Zealand (2020a, pp. 27–44; 2021b); Ministry of Housing and Urban Development (2021b); Durie (2019); Te Mana Raraunga (2016).

References converted from Chicago author-date to APA 7. Hedged persona attributions remain in the source document.

Post-pilot source audit. The rural qualifier is removed from the underconnection anchor: Grimes & White finds rural areas and settlements under 10,000 have higher access than larger country towns (Table 16); the claim holds through ethnicity. Non-digital authority is re-pointed within the pilot-time corpus to Durie and Te Mana Raraunga, which already ground the adjacent kanohi ki te kanohi claims, with Grimes & White retained as access context. Financial Markets Authority (2024) is removed from the reference list as uncited by any anchor; the master annotation now reads Cases 2 and 3. Statistics New Zealand (2018a) is removed from the scene anchor; Census 2018 was not a source for the address-system claims.
