BEYOND THE SCORE

Case 1 · Trace Sheet

Design apparatus for BTS_Case1_Reading

1 · CASE POSITION (HISTORICAL DESIGN)

Pilot 1, Case 1 of 4. Keying (as designed): Samoan–Māori intergenerational household, South Auckland (Ōtāhuhu), rented Kāinga Ora dwelling near the estuary. Scenario: open banking consent and predictive lending meeting climate-driven managed retreat. Trigger events: managed-retreat notification; predictive loan offer via open banking. Household: Teuila-Rose (19), Maria (45), Asofa (71). Actor: institutional — automated scoring and prediction reaching the household through a letter and an app notification; single-scene exposure. Lead card: with no care recipient in this pilot, the member the system addressed (Teuila-Rose, whose consent generated the offer) takes the full-width position. The open-banking mechanics modelled here were prospective at the time of the pilot; major-bank data-holder designation under the Customer and Product Data framework commenced 1 December 2025.

2 · CORPUS ANCHORS

Teuila-Rose: open-banking ambivalence and predictive offers — Financial Markets Authority & Reserve Bank of New Zealand (2018); Ministry of Business, Innovation and Employment (2025). Youth digital intermediary role — Correa (2014); King-Finau et al. (2021); Ministry for Pacific Peoples (2022). Youth mental health context — Fleming et al. (2020); social-media environment — Marsh et al. (2025). Emotional buffering within the household: attribute constructed at design; no direct corpus source (post-pilot audit). Hybrid identity cross-pressure — Hunkin-Tuiletufuga (2001); Webber (2012); Ministry for Pacific Peoples (2018, p. 44).

Maria: protective financial conservatism and institutional distrust — Financial Markets Authority & Reserve Bank of New Zealand (2018); Te Ara Ahunga Ora Retirement Commission (2021); Ministry for Pacific Peoples (2022). Housing precarity and displacement pattern — Ministry of Housing and Urban Development (2021a); Ministry for the Environment (2022). Sandwich-generation load — Superu (2015).

Asofa: first-generation Pacific migrant patterns — Ministry for Pacific Peoples (2018, p. 28; 2022). Low digital access — Grimes & White (2019, Tables 11, 13, 19); Department of Internal Affairs (2019). These sources document access rather than preference; the rendered preference for face-to-face dealing on consequential matters is an extension of the access finding, not a claim the sources make. High interdependence — Ministry for Pacific Peoples (2018, pp. 27–28). Elder anchor role — Ministry of Social Development (2012); Superu (2015). Kanohi ki te kanohi preference — Hunkin-Tuiletufuga (2001).

Scene: multigenerational rental household base rates — Statistics New Zealand (2020a, pp. 124–129, Figure 105); Superu (2015); managed retreat — Ministry for the Environment (2022, ch. 5).

4 · LOG

References converted from the case's Chicago author-date to APA 7. The source case marks inferred persona attributes with constructed/positioned phrasing; reading-edition snapshots keep only what the composite states, and the hedged attributions remain in the source document. Reference corrections: Webber (2012) is keyed to the published title and page range verified against the NZCER record, “Identity matters: Racial-ethnic identity and Māori students,” Set 2, 20–27, doi 10.18296/set.0370; the ‘Māori academic achievement’ ending previously carried here is not the published title, and the widely cited ‘role of racial-ethnic identity … multiethnic secondary schools’ variant derives from Webber’s 2011 doctoral thesis. Nga vaka o kāiga tapu is re-keyed from Pasefika Proud to Ministry of Social Development (2012), matching the document’s own commissioning statement; Pasefika Proud is the MSD campaign hosting the resource, not the issuing body. The title page names no corporate author, so the attribution is inferred from the commissioning statement and from external citation practice.

Post-pilot source audit. Scene and access anchors now carry page locators to Housing in Aotearoa: 2020 and Grimes & White. Statistics New Zealand (2018a) is retired per the master list; Housing in Aotearoa: 2020 carries its claims. Emotional buffering is marked constructed: Marsh et al. addresses the social-media environment and youth wellbeing, not intra-family buffering. High interdependence and first-generation settlement patterns are retained as anchored: Lalanga Fou records kinship reciprocity and obligation to community wellbeing (p. 27) and intergenerational living and resource pooling (p. 28), and locators are now supplied. A prospective-mechanics note is added to the case position.
